Wget [100%] https://openmtbmap.org/wp-content/mkgmap/gmt.exe
eets in Blue/Orange/Red/Yellow)
press 2 for wide*.TYP (Wide Layout - high contrast layout, like classic but Wider stre
ets - for higher DPI Garmin devices)
press 3 for wldg*.TYP (Wide Legacy Layout -same as above but with high contast streets
in Blue/Orange/Red/Yellow)
press 4 for trad*.TYP (Trad Layout for Mapsource, Qlandkarte or pc screens. Low contra
st for big resolutions (800x600 and up). No good on GPS. Simpy reinstall with other .T
YP before sending maps to GPS.)
press 5 for hike*.TYP (Similar to Easy but fully optimized for hiking.)
press 6 for wint*.TYP (Winter - like hiking layout - but optimized for Winter Sports (
does not show mtb/bicycle informations))
press 7 for easy*.TYP (Easy --- Simple Layout with Same width as Wide. No additional l
ines for (mtb:scale(:uphill)/cycleway=*). Colors similar to topo maps/google maps)
press 8 for fenx*.TYP (Fenix --- similar to Wide Legacy but optimized for Fenix series
5/6 watches which can only show 64 colours)
0-8:0
You have chosen TYP=0
clas*.TYP will be used
gmt.exe found.
Please input a free FID consisting of a number between 100-9999.
Hint: use the same first 4 digits as the map 6*.img files.
so if maps have the normal maps have 6365, use 6365.
Never two mapsets on your GPS may have the same FID.
enter help for an explication on howto find a free FID.
NEVER TWO MAPS ARE ALLOWED TO USE THE SAME FID. ELSE ONE WILL NOT SHOW UP ON YOUR GPS
or maybe even not boot up.
100-9999:
```

```
C:\WINDOWS\system32\cmd.exe
d up). No good on GPS. Simpy reinstall with other .TYP before sending maps to GPS.)
press 5 for hike*.TYP (Similar to Easy but fully optimized for hiking.)
press 6 for wint*.TYP (Winter - like hiking layout - but optimized for Winter Sports (does not show mtb/bicycle informat
ions))
press 7 for easy*.TYP (Easy --- Simple Layout with Same width as Wide. No additional lines for (mtb:scale(:uphill)/cycle
ways=*). Colors similar to topo maps/google maps)
press 8 for fenx*.TYP (Fenix --- similar to Wide Legacy but optimized for Fenix series 5/6 watches which can only show 6
4 colours)

100-9999:235
You have chosen FID=235
BASECAMP VISIBILITY
- do you want that the resulting map when present on device memory shows up in basecamp when connected?
- note that reading in the map by Basecamp takes some time. Therefore it is off by default now.
- However it can be useful to some.
- Press 0 or any other key to keep map invisible to Basecamp. Press 1 to make map readable by Basecamp

vice.
Don't use Umlauts, spaces or symbols like : , ? ....
for South_Africa_and_Lesotho e.g.: S_Africa

enter 1 up to 12 characters:Iceland_21
You have chosen Iceland_21

Note if it is longer than 12 characters it will be cut off

Note: modern Garmin GPS devices are compatible with multiple gmapsupp.img
if you have an older Garmin GPS device, or don't know - best choose option 0 or 4.

Please choose if you want to generate
0 One map integrating contourlines (not possible to chose contourlines layout)
1 Plain map without contourlines
2 Contourlines only map (possible to customize contourlines layout)
3 Map without contourlines and additionally contourlines only map
Makes it possible to switch on/off the contourlines on newer GPS devices.
Note: mode 3 is not possible for older GPS devices.
(possible to customize contourlines layout)
4 identical to 3 but join maps into one gmapsupp.img with gmt.exe for older Garmin GPS devices.
This allows to switch on/off contourlines on older GPS, while on newer this shows up as one map only.
(possible to customize contourlines layout)
